

The Belgian Interdisciplinary Working Group on Acute Cardiology aims at promoting the highest quality of care for patients with acute cardiac diseases.

Our third congress will take place on Friday, 1st June 2012 and will focus on :

- Acute coronary syndromes
- Acute cardiac care beyond coronary arteries...

State-of-the-art lectures will be given by international and national experts, these will be illustrated with real life cases.

We are pleased to offer you enclosed the newest flowchart on the management of acute coronary syndromes.

This flowchart has been updated with data from recently published European guidelines (2010) and contains information about the dosage of the most frequently used drugs available in Belgium. We hope that this pocket flowchart will be of help in your daily practice.

Kind Regards,
The Scientific Committee

Prof Christophe Beauloye, UCL, Bruxelles
Dr Antoine de Meester, Hôpital de Jolimont
Dr Sofie Gevaert, UZ Gent
